

SECTION 1 -- GENERAL EDUCATION PROGRAMS

General Education: Common Goals – Different Paths

The three public institutions of higher education in Rhode Island each offer courses in general education for their students. Each institution has a distinctive mission, and each has the responsibility to establish and maintain its own general education program with separate course requirements. It is agreed these different paths do converge, and, therefore, many general education courses will transfer, with all three schools having the following common goals:

- ❖ Clear, correct and effective writing in English
- ❖ Persuasive speaking in English
- ❖ Engaged reading
- ❖ Critical thinking and problem-solving
- ❖ Cultural diversity and understanding human differences
- ❖ Information access and technology application
- ❖ Scientific literacy
- ❖ Quantitative reasoning and analysis
- ❖ Literary and artistic thought and expression
- ❖ Ethically and morally informed decision making
- ❖ Appreciation of global wisdom and historical perspectives

It is important to develop a plan for meeting the general education requirements. Many of the general education requirements at CCRI, RIC, or URI can be satisfied at the college you currently attend. It is a good plan to complete as many of the general education requirements before you transfer as your current school will allow. Advisors can provide advice and suggestions of courses that meet the requirements.

This section describes the general education requirements for CCRI, URI, and RIC. Please note that the general education requirements, and, in some instances, the courses that fulfill the requirements, may be specified by the college of the major. Following the descriptions of the general education programs is a list of all the general education courses and their equivalencies at the other institutions. **Use the information in this section when you discuss your educational plans and select courses with an advisor.**

GENERAL EDUCATION PROGRAM AT THE COMMUNITY COLLEGE OF RHODE ISLAND

General education is the component of a Community College of Rhode Island degree program that is intended to develop a student's higher order thinking, communication and reasoning skills. These skills empower the student to explore the cultural and geographic relationships among peoples and expand a student's understanding of the natural world. General education courses contribute to the improvement, discipline and free development of the mind and spirit.

Completion of the general education component is an essential step in enabling students to satisfy CCRI's Graduate Outcomes statement. Fundamental competencies gained through the CCRI General Education program include:

- clear and correct expression in both written and spoken English
- the ability to recognize, understand and adjust to changes in life and work
- problem-solving and analytical skills
- awareness of historical, cultural and economic influences on life and work
- appreciation of the roles of the arts, humanities, science and technology

The general education component, with the professional or occupational courses required for a student's degree, form the foundation of occupational competence by increasing a student's appropriate professional skills, pride in quality performance, understanding of each individual's role and contribution within an organization, and the ability to function as a member or leader of a team in the workplace and larger community.

Students transferring to the Community College of Rhode Island must follow the specific program requirements as shown in the current catalog. Consultation with an advisor is strongly recommended. Any questions concerning official transfer evaluation or the transfer admissions process should be directed to:

GENERAL EDUCATION PROGRAM AT THE UNIVERSITY OF RHODE ISLAND (URI)

General Education Requirements

The University believes that all undergraduate students, regardless of their degree programs, need experience in the study of fundamentals that builds on the student's previous education and continues through the undergraduate years and beyond. All bachelor's degree students follow the same university-wide general education requirements. While general education requirements for all students are selected from the same list of approved courses, there are possible variations based on the student's major. Students should consult specific college and departmental requirements and discuss the requirements with an advisor. In their first semester, all entering freshmen and new transfer students with less than 24 credits are required to take URI 101 *Traditions and Transformations: A Freshman Seminar*, including community service provided by the Feinstein Enriching America Program

The purpose of general education at the University of Rhode Island is to lay a foundation for the lifelong enrichment of the human experience and for a thoughtful and active engagement with the world. This foundation is built on recognition of the complexity of nature, society, and the individual. The objective of general education is to introduce students to the fundamental dimensions of this complexity and to develop an appreciation of different ways of understanding it and different cultural responses to it.

Corresponding with these goals, the general education program is divided into the following core areas:

English Communication. Six credits in English communication, at least three of which must be in a course designed specifically to improve written communication skills.

Fine Arts and Literature. Six credits in courses on artistic and literary expression and interpretation.

Foreign Language/Cross-cultural Competence. Six credits or the equivalent in coursework related to communicating across cultures.

Letters. Six credits in courses that address wisdom and traditions of the past and present in a global setting.

Mathematical and Quantitative Reasoning. Three credits in a course on mathematical and quantitative skills and their application.

Natural Sciences. Six credits in courses on the interrelationships of the natural world.

Social Sciences. Six credits in courses related to the study of human behavior in social, economic, cultural, and political contexts.

Because particular skills are essential to a thoughtful engagement with the world, each course in General Education incorporates opportunities to practice three (3) or more of the following skills: reading complex texts, writing effectively, speaking effectively, examining human differences, using quantitative data, using qualitative data, using information technology, engaging in artistic activity.

In addition, the University has a commitment to providing students with the opportunity to examine diversity within and across national boundaries and requires that at least two of the courses taken as part of a student's general education program must be designated as diversity [D] courses. Only one course in a foreign language may be applied to the diversity requirement. Since these diversity courses may be selected from any of the general education core areas, this requirement does not increase the total number of credits in the general education program.

Specific courses that may be used to meet these requirements are listed in the following groups:

English Communication: Writing (ECw) BGS 100; ELS 112, 122; WRT 104, 105, 106, 201, 227, 235, 302, 303, 304 [D], 305 [D], 333; **General (EC)** COM 100 [D], 110 [D], LIB 120, PHL 101.

To use the chart, first locate the row for the college at the University of Rhode Island in which you intend to enroll; then, read the entries under each column for specific requirements within each area. For specific course listings, refer to the pages following the chart.

UNIVERSITY COLLEGE URI GENERAL EDUCATION REQUIREMENTS BY COLLEGE

The chart below summarizes the URI general education requirements by college. Because each college has different requirements, students should consult their academic advisor and URI Catalog when selecting courses. Reference should be made to the URI general education requirements and to the requirements of individual majors.

Please note: although a course may be listed in more than one general education category, it can only be used to meet one requirement.

1. Engineering students need to be aware that there are certain courses in Fine Arts & Literature, Letters and Social Science which are not approved for their program.
2. Students enrolled in the Colleges of Nursing, Pharmacy or Environment & Life Sciences may reduce the credit requirements in Fine Arts & Literature, Foreign Language/Cross-cultural Competence or Letters by 3 credits.

GENERAL EDUCATION PROGRAM AT RHODE ISLAND COLLEGE (RIC)

The General Education Program at Rhode Island College consists both of a core curriculum and of distribution requirements. In the core, students must take a set of four related courses which provide an understanding of cultural and historical traditions that shaped the world in which they live and a critical appreciation of values, ideas, and practices which have emerged from these traditions. Courses in the core are writing intensive with an emphasis on critical thinking. In fulfilling distribution requirements, students must take six courses which expand their knowledge by exposure to social and behavioral sciences, to visual and performing arts, and to natural sciences and mathematical systems. The ten courses required of General Education are outlined on the next page. Specific courses in some of the distribution areas may also fulfill requirements in a major, so students planning to transfer to Rhode Island College are urged to read the current catalog and discuss their coursework with an academic advisor. Information on RIC's general education program can be accessed at www.ric.edu/gened.

I. CORE STUDIES IN CULTURAL LEGACIES AND CRITICAL THINKING: (courses in parentheses are equivalent CCRI courses)

Core 1 (C1) Western Literature	English 161 * (ENGL 1040 OR 2040)
Core 2 (C2) Western History	History 161 * (HIST 1010 OR 1020)
Core 3 (C3) Non-Western Worlds	Dept 16x (HIST 2260 or ARTS 1530)
Core 4 (C4) Critical Inquiry into Cultural Issues	GE/Dept 26x

(Cores 1, 2 & 3 must be completed before enrolling in Core 4)

* Students who are already matriculated at RIC must take these courses at RIC.

II. DISTRIBUTION REQUIREMENTS: (Courses in parentheses are equivalent CCRI courses.)

NOTE: Students must also satisfy the college writing and mathematics requirements (see page i-9).

GENERAL EDUCATION COURSE EQUIVALENCY LISTING

In using the following listing of course equivalencies, please note that the letters **GE** within brackets -- [GE] -- indicates that the course fulfills a general education requirement. The letter or letters following the hyphen tell you what specific category(ies) of general education the course fills. Use the table below to understand the letter abbreviations at URI or RIC and refer back to the explanation of the general education programs in the preceding pages. For more information or if you have questions, refer to the CCRI, RIC or URI catalog or ask your transfer advisor.

The general education requirements at CCRI are specific to individual programs. For more information on general education requirements at CCRI speak with your advisor or faculty advisor. Please note that general education programs are specific to a college. A course meeting a general education requirement at one institution will not necessarily meet the similar requirement at another college.
